

HB6618 - "An Act Concerning Medical Assistance for Certain Persons Receiving Abortion Care and Related Services in Connecticut"

This is my opinion about abortion in general and HB 6618.

I believe that in CT and in every state there should be a law that helps young and adult men and women be conscious about sexual responsibility, and before they become sexually active to avoid abortion.

Create preventive system for low income women and families that avoid abortion and create comprehensive sexual education enables young people to protect and advocate for their health, well being and dignity.

Because abortion affects not just the life of an innocent human being, but also the psychology of a woman for her entire life.

I think that this bill should be analyzed knowing the psychological and psychiatric implication of abortions on women in different social, economic and cultural environments. Analyzing mental health consequences and finding better ways to avoid procedures and establish a better preventive system would help the well-being of the women and society of this great nation.
